LOCALLY RELEVANT RESEARCH

With island features and a low rural population, Hawaii faces rising sea levels, weather extremes, and natural disasters.

To understand how research at public institutions can help policy-makers respond to those issues, NCSE examined what climate-related work came out of the University of Hawaii, chosen because of its research classification, enrollment size, and/or land grant status over the last 5 years (2014-2018).

KEYWORDS	
<i>Local</i>	Tropical Pacific
	Western North Pacific
	Equatorial Pacific
	North Pacific
	Great barrier Reef
<i>Regional</i>	El Nino Southern Oscillation
	Sea Level Rise
	Tropical Cyclones
	Coral Reefs
<i>National</i>	Variability
	Impact
	Temperature
	Rainfall
